Description

The P136-06N-H2V2 DisplayPort 1.2 to HDMI Active Converter connects a DisplayPort 1.2 computer to the HDMI port on a monitor, projector or television. With a male DisplayPort connector and a female HDMI connector, this converter lets you use your existing HDMI display instead of buying a new DisplayPort monitor.

Compliant with HDMI 2.0 specifications, the P136-06N-H2V2 is ideal for displaying crystal-clear video on a large monitor or digital sign. It supports Ultra High Definition (UHD) video resolutions up to 3840 x 2160 (4K x 2K) at 60 Hz, as well as rich, full audio (if your DisplayPort card supports audio passthrough) and HDCP 2.2. Because it's an active converter, the P136-06N-H2V2 is compatible with both Single-Mode and Dual-Mode (DP++) DisplayPort output. It's recommended for use with graphics cards, such as AMD Eyefinity, that do not output DP++ signals.

The P136-06N-H2V2 is plug and play with no software, drivers or power supply needed. Connectors with corrosion-resistant gold-plated contacts provide maximum conductivity and minimize data loss. Integral strain relief with ridges on each end gives the cable extra flexibility, reduces stress, and helps the cable and connectors move freely without cracking. The P136-06N-H2V2 fits easily in a briefcase, backpack or laptop bag for connecting on the go.
