*5 m 16.4041 ft cable length type: Certified (for sales in China only)

Multi-voltage photoelectric sensor usable worldwide

Multi-voltage

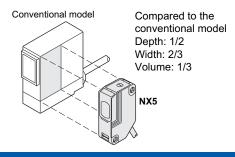

The NX5 series can operate at 24 to 240 V AC or 12 to 240 V DC, which is suitable for supply voltages around the world.

No need to arrange a DC power supply.

Compact size

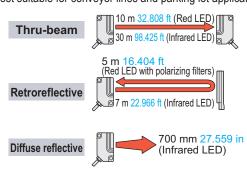

Despite of being multi-voltage, it has a depth of just 35 mm 1.378 in. (W18 × H62 × D35 mm W0.709 × H2.441 × D1.378 in)

BASIC PERFORMANCE

Long sensing range

It is most suitable for conveyor lines and parking lot applications.

High reliability

It has an IP66 protection. Moderate dust or water splashes will not affect the sensor.

The hermetically sealed output relay significantly increases its reliability.

FUNCTIONS / MOUNTING

Easy alignment

The 10 m 32.808 ft thru-beam type sensor and the 5 m 16.404 ft retroreflective type sensor incorporate a red LED beam source. Beam alignment can be attained by checking the emitted beam visually.

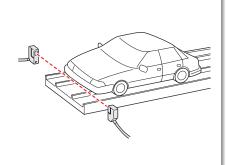

Interference prevention

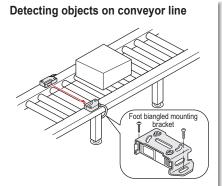

Two sensors can operate normally even if mounted close together.

(Excluding the 30 m 98.425 ft thru-beam type sensor)

APPLICATIONS

Detecting car position at parking garage

NOTE: Mounting bracket is not supplied with the sensor. Please select from the range of optional sensor mounting brackets (three types).

Notes: 1) The sensing range of the retroreflective type sensor is specified for the RF-230 reflector. Further, the sensing range is the possible setting range for the reflector. The sensor can detect an object less than 0.1 m 0.328 ft away.

- 2) The model No. with "P" shown on the label affixed to the thru-beam type sensor is the emitter, "D" shown on the label is the receiver.
- 3) Light-ON type sensor (model No. with suffix "A") and Dark-ON type sensor (model No. with suffix "B") are available in the NX5 series. For the following models, in case of power off, the output relay condition is the same as when an object is detected. (In case of power supply line disconnection, the output operation is the same as when an object is detected.) Refer to "I/O CIRCUIT DIAGRAM AND OUTPUT OPERATION (p.405)" for the output operation of each model.

5 m 16.404 ft cable length type

5 m 16.404 ft cable length type (standard: 2 m 6.562 ft) is also available. When ordering this type, suffix "-C5" to the model No.

(e.g.) 5 m 16.404 ft cable length type of NX5-M10RA is "NX5-M10RA-C5".

Correlation between sensing object size and sensing range

As the sensing object size becomes smaller than the standard size (white non-glossy paper 200×200 mm 7.874×7.874 in), the sensing range shortens, as shown in the left graph.

For plotting the left graph, the sensitivity has been set such that a 200 × 200 mm 7.874 × 7.874 in white non-glossy paper is just detectable at a distance of 700 mm 27.559 in.

PRECAUTIONS FOR PROPER USE

Refer to p.1458~ for general precautions.

<u>^</u>

• Never use this product as a sensing device for personnel protection.

for personnel protection.

In case of using sensing devices for personnel protection, use products which most laws and standards such as OSHA.

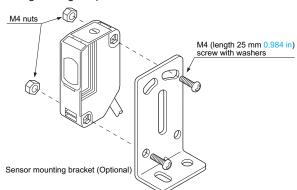

personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Others

- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- Although the protection degree is specified for the sensor including the cable, the cable end is not waterproof, and is not covered by the protection specified. Hence, make sure that water does not seep in from the cable end.

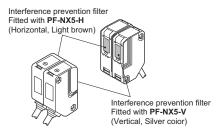

Mounting

• The tightening torque should be 0.8 N·m or less.

Interference prevention filter (Exclusively for NX5-M10R_□)

- Use the interference prevention filters (optional) when two units of thru-beam type sensors are mounted close together. However, take note that the sensing range will become short.
- There are 2 types of interference prevention filters. Install PF-NX5-H (Horizontal, Light brown) for 1 set, and install PF-NX5-V (Vertical, Silver color) for the other set.

Note: The filters cannot be used for NX5-M30A or NX5-M30B.

PRECAUTIONS FOR PROPER USE

Refer to p.1458~ for general precautions.

Retroreflective type sensor (NX5-RM7_□)

- · Please take care of the following points when detecting materials having a gloss.
- ① Make L, shown in the diagram, sufficiently long.
- 2 Install at an angle of 10 to 30 degrees to the sensing object.
- * NX5-PRVM5

 does not need the above adjustment.

Retroreflective type sensor with polarizing filters (NX5-PRVM5_□)

• If a shiny object is covered or wrapped with a transparent film, such as those described below, the retroreflective type sensor with polarizing filters may not be able to detect it.

In that case, follow the steps given below.

Example of sensing objects

- · Can wrapped by clear film
- · Aluminum sheet covered by plastic film
- · Gold or silver color (specular) label or wrapping paper

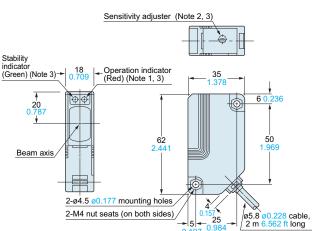

Steps

- Tilt the sensor with respect to the sensing object while fitting.
- · Reduce the sensitivity.
- Increase the distance between the sensor and the sensing object.
