2.5-GHz, High Dynamic Range, Low-Noise Down-Converter

FEATURES

- **Performs First Down-Conversion in MMDS / WCS Radio 2300 MHz to 2700 MHz**
- **Integrated Low Noise, Variable Gain Amplifier**
- **Provisions For An External Image Reject / Band Pass Filter**
- **Differential Mixer Provides Extra Noise Immunity**
- **Integrated LO Buffer Amplifier**
- **20 dB of Gain With 10 dB of Gain Control**
- **3-dB Noise Figure, Typical**
- **Input Third Order Intercept of 0 dBm, Typical**
- **Input P-1 dB of –5 dBm, Typical**
- **LO Input Power: 3 dBm**

DESCRIPTION

The TRF1115 is the first of two ASICs used in the receiver section of Texas Instruments MMDS/MDS/WCS/802.16x chipset. The TRF1115 down-converts the input frequency to an IF frequency in the range of 420 MHz to 480 MHz. The device provides a differential output that passes through a SAW filter before connecting to a second down converter chip. (Note: For the best performance, the Texas Instruments TRF1112 should be used to perform both the second down conversion and provide the local oscillator for the TRF1115.)

In order to provide exceptional image rejection and extra jammer rejection, the TRF1115 offers a signal path to an off-chip filter. Specifications are provided assuming an in-band 1.5-dB loss in this filter. The TRF1115 includes a differential LO buffer, mixer, and IF amplifier for improved performance. After the filter, an on-chip balun converts the signal from single-ended to differential in order to provide better noise immunity in the mixer.

DEVICE INFORMATION

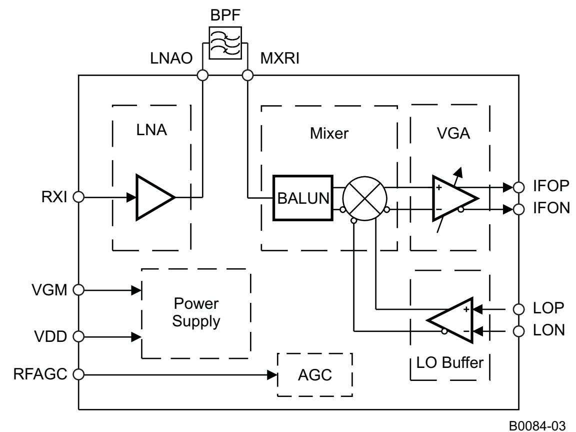

Figure 2. Block Diagram

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

ABSOLUTE MAXIMUM RATINGS

		VALUE	UNIT
VDD	Positive DC Supply Voltage, VDD	0.0 to +5.5	V
IDD	Current consumption	200	mA
Pin	RF Input Power	5	dBm
T_J	Junction Temperature	200	°C
Pd	Power Dissipation	1.1	W
	Digital Input Pins	–0.3 to 5.5	
θ_{JC}	Thermal Resistance Junction to Case[1]	9.1	°C/W
T_{stg}	Storage Temperature	–40 to 105	°C
T_{op}	Operating Temperature	–40 to 85	°C
	Lead Temperature (40 sec max)	260	°C

(1) Thermal resistance is junction to ambient assuming thermal pad with 16 thermal vias under package metal base. See Recommended PCB layout.

DC SPECIFICATIONS

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
VDD	Supply Voltage			5	5.25	V
IDD	Supply Current (Total)			130	180	mA
I_{LNA}	Supply Current, LNA, pin 3			30		mA
I_{LO}	Supply Current, LO, pin 9			45		mA
I_{IF}	Supply Current, IF	Pins 10 plus IF drain bias on pins 13 and 14.		55		mA
V_C	Gain Control Voltage		0		2	V
I_C	Gain Control Current		0		1.2	mA

ELECTRICAL CHARACTERISTICS

Unless otherwise stated VDD = 5.0 V, External Filter loss = 1.5 dB, T_A = 25°C

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
f_{RF}	RF input frequency		2300		2700	MHz
f_{LO}	LO input frequency		1820		2220	MHz
f_{IF}	IF output frequency		400	480	500	MHz
G	Gain	V_C = 0 V	16	18		dB
	Gain control range	V_C > 1.5 V		10		dB
G_{NB}	Gaub fkatbess / 6 MHz				0.2	dB
NF_{HG}	Noise figure, high gain	V_C = 0 V		3	4	dB
NF_{LG}	Noise figure with AGC on	V_C > 1.5 V		6	7	dB
IP-1dB	Input power at 1 dB compression, high gain	V_C = 0 V, Without RF BPF	-6	-2		dBm
IP-1dB	Input power at 1 dB compression with AGC on	V_C > 1.5 V, Without RF BPF	-1	2		dBm
IIP3	Input third order intercept point, high gain	V_C = 0 V, Without RF BPF	-3	0		dBm
IIP3	Input third order intercept point with AGC on	V_C > 1.5 V, Without RF BPF	5	8		dBm
Z_{RF}	RF input impedance	Differential		50		Ω
RL_{RF}	RF input return loss	Z = 50 Ω, P_{LO} = 3 dBm, F_{RF} = 2500 to 2700 MHz	8	10		dB
Z_{LO}	LO input impedance	Differential		100		Ω
P_{LO}	LO input power	Referenced to 100 Ω differential	0	3	6	dB
RL_{LO}	LO input return loss	Differential, with external matching circuit. LO input = 3 dBm	–10	–12		dB
Z_{IF}	IF output impedance	Differential		100		Ω
RL_{IF}	IF1 output return loss	Differential, with external matching circuit	–7	–10		dB
	LO to RF leakage, differential	LO input = 3 dBm, V_C = 0 V	–35	–45		dBm
	LO to IF1 leakage, differential	LO input = 3 dBm, V_C = 0 V	–40	–50		dBm
	RF to IF1 isolation, differential	LO input = 3 dBm, V_C = 0 V	35	45		dBc
	RF to LO insolation, differential	LO input = 3 dBm, V_C = 0 V		25		dBc

TERMINAL FUNCTIONS

TERMINAL		I/O	TYPE	DESCRIPTION
NO.	NAME			
1, 2, 6, 12, 15, 19	GND			Ground
3	LNAO	O	Analog/Power	Output of LNA, before mixer, Also provides DC bias to FET. Apply 5 V bias thru bias network.
4	RES			Reserved. Do not connect or ground this pin.
5	LOB			Not connected for normal operation. Internal bias for LO buffer. Normal voltage at this pin is 3.0 to 3.2 V. Do not ground this pin or connect.
7	LOP	I	Analog	LO input, Positive, ac coupled internally
8	LON	I	Analog	LO input, Negative, ac coupled internally
9	VDD	I	Power	DC bias for LO Buffer +5 V
10	VDD	I	Power	DC bias for IF circuit +5 V
11	IFB			Not connected for normal operation. Internal bias for IF circuitry Normal voltage at this pin is 2.8 to 3.0 V. Do not ground this pin or connect.
13	IFON	O	Analog/Power	IF output, negative, and dc bias for IF amplifier. Apply +5 V through bias network.
14	IFOP	O	Analog/Power	IF output, Positive, and dc bias for IF amplifier. Apply +5 V through bias network.

TERMINAL FUNCTIONS (continued)

TERMINAL		I/O	TYPE	DESCRIPTION
NO.	NAME			
16	RFAGC	I	Analog	Input voltage for gain control: V_C = 0 to 1.5 V Maximum gain at V_C = 0 V Minimum gain at V_C = 1.5 V
17	MXRPB			Not connected for normal operation. Internal bias for mixer circuitry. Normal voltage at this pin is 1.8 V to 2.5 V. Do not ground this pin or connect to any other pin.
18	MXRI	I	Analog	Input to RF mixer, ac coupled, 50 Ω
20	RXI	I	Analog	RF input, ac coupled, 50 Ω
Back	GND			Back of package has metal base that must be grounded for thermal and RF performance.

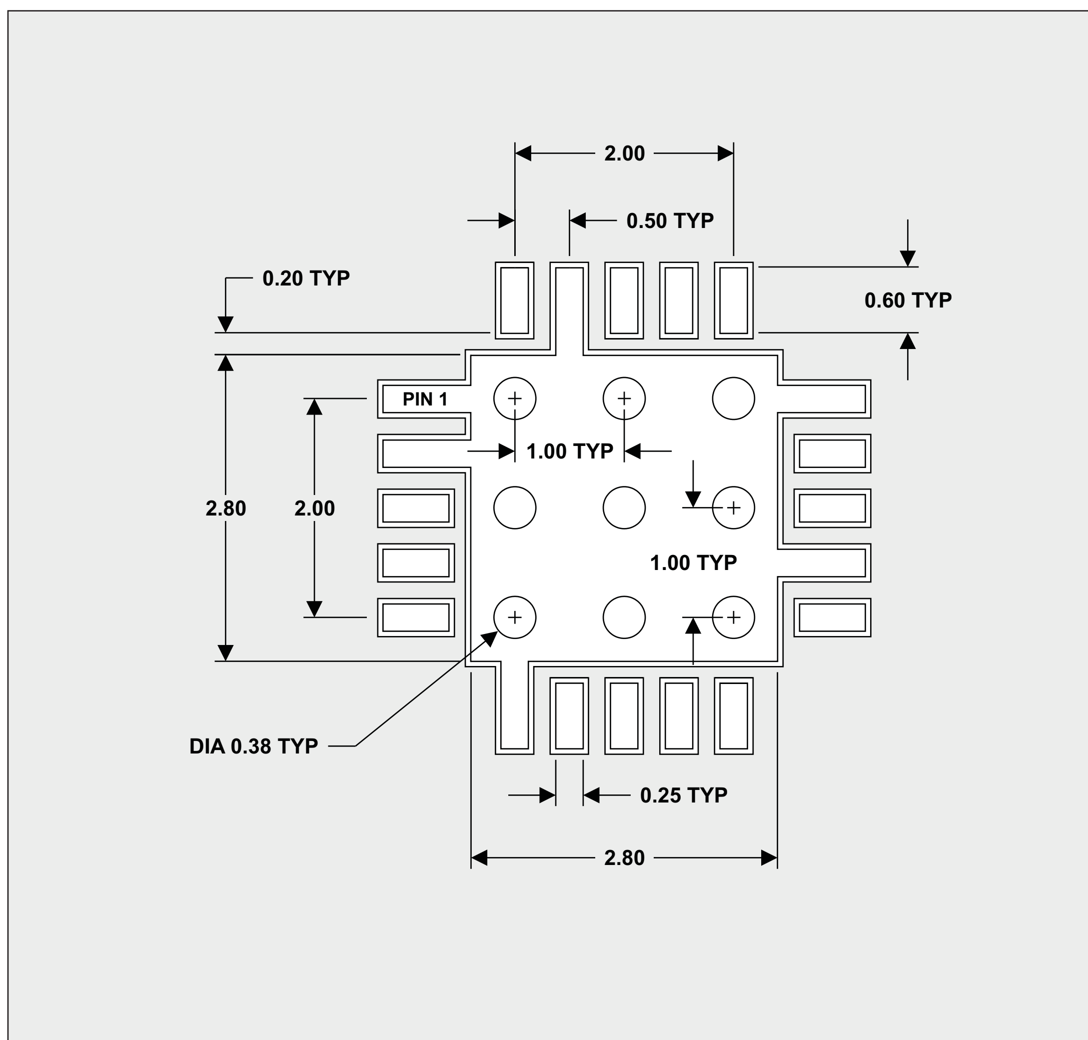
RECOMMENDED PCB LAYOUT



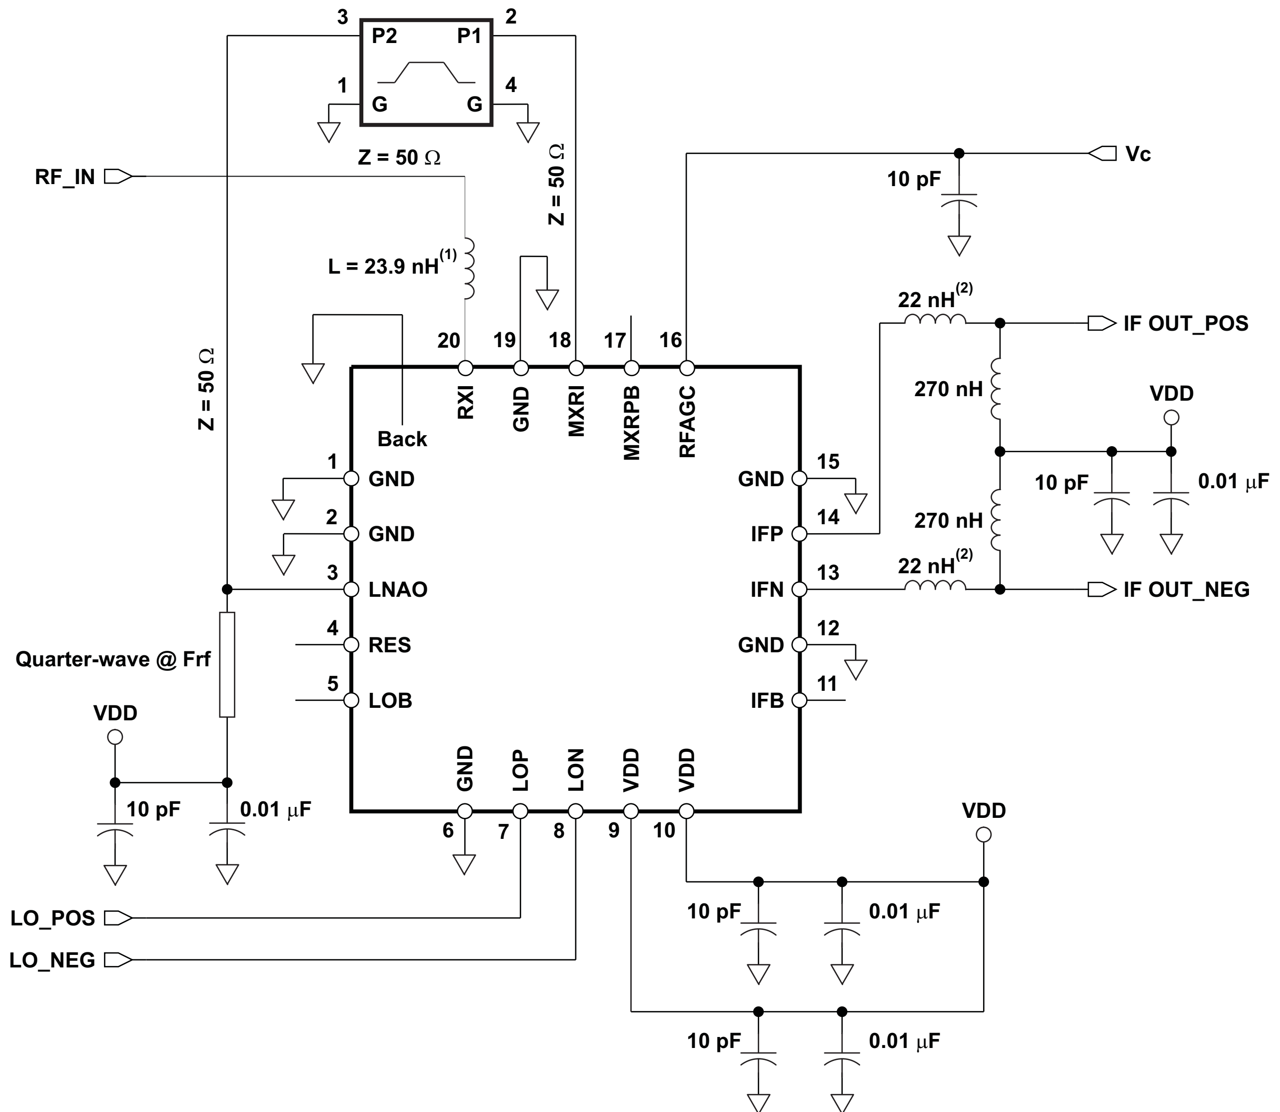
Solder Mask. No Solder Mask Under Chip, On Lead Pads or On Ground Connections.

Notes: 9 Via Holes, Each 0.38 mm.
DIMENSIONS in mm

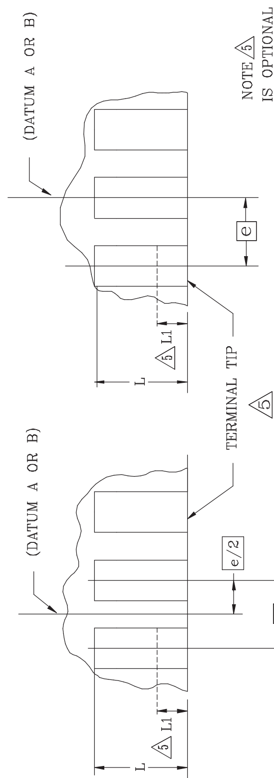
M0022-04

A. Four layer Board, Starting material: two: 10 mil core FR4 with 1 oz copper, both sides, pressed with 8 mil thick prepreg. Via plating ½ oz copper plate, final plate White immersion tin. Final thickness: 0.033” to 0.037” thick.

APPLICATION SCHEMATIC



APPLICATION INFORMATION



SYMBOL	COMMON DIMENSIONS MIN.	NOM.	MAX.	NOTE
A1	0	0.02	0.05	
A3		0.25 REF.		
k	0.20	—	—

N	20		
ND	5		
NE	5		

NOTES:

1. DIMENSIONING AND TOLERANCING CONFORM TO ASME Y14.5M−1994.

2. ALL DIMENSIONS ARE IN MILLIMETERS. ANGLES ARE IN DEGREES

3. N IS THE TOTAL NUMBER OF TERMINALS

4. THE TERMINAL #1 IDENTIFIER AND TERMINAL NUMBERING CONVENTION SHALL CONFORM TO JESD 95−1 SPP−012. DETAILS OF TERMINAL #1 IDENTIFIER ARE OPTIONAL, BUT MUST BE LOCATED WITHIN THE ZONE INDICATED. THE TERMINAL #1 IDENTIFIER MAY BE EITHER A MOLD OR MARKED FEATURE.

5. DIMENSION b APPLIES TO METALLIZED TERMINAL AND IS MEASURED BETWEEN 0.25mm AND 0.30mm FROM TERMINAL TIP. DIMENSION L1 IS THE TERMINAL PULL BACK FROM PACKAGE EDGE, UP TO 0.1mm IS ACCEPTABLE. L1 IS OPTIONAL.

6. ND AND NE REFER TO THE NUMBER OF TERMINAL ON EACH D AND E SIDE RESPECTIVELY.

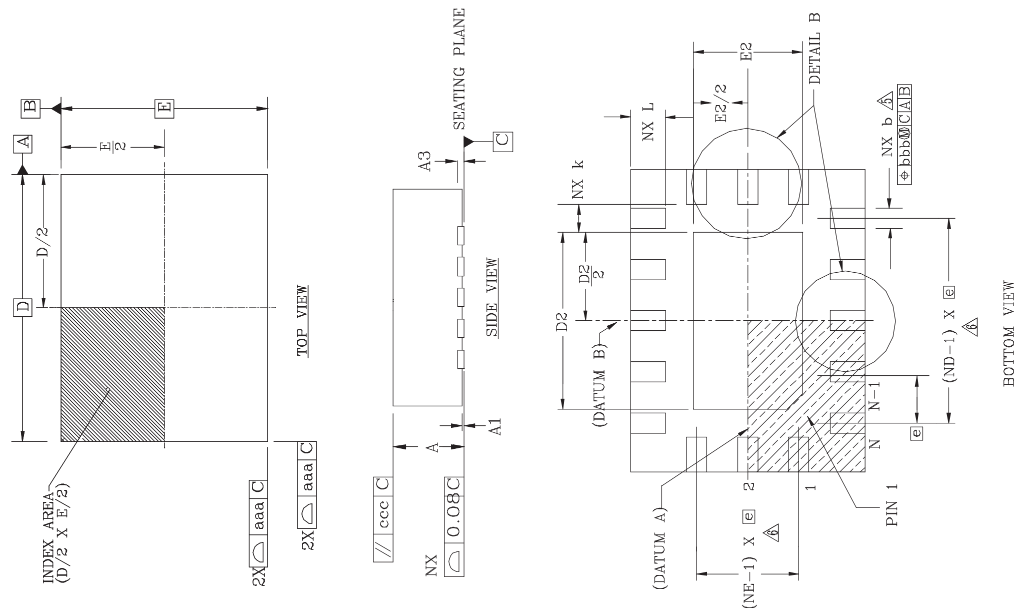

Figure 8. Package Outline: 4 mm x 4 mm LPCC 20-Pin Leadless Package

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples

TRF1115IRGPTG3	ACTIVE	QFN	RGP	20	250	Green (RoHS & no Sb/Br)	CU SN	Level-3-260C-168 HR		TRF 1115	Samples

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

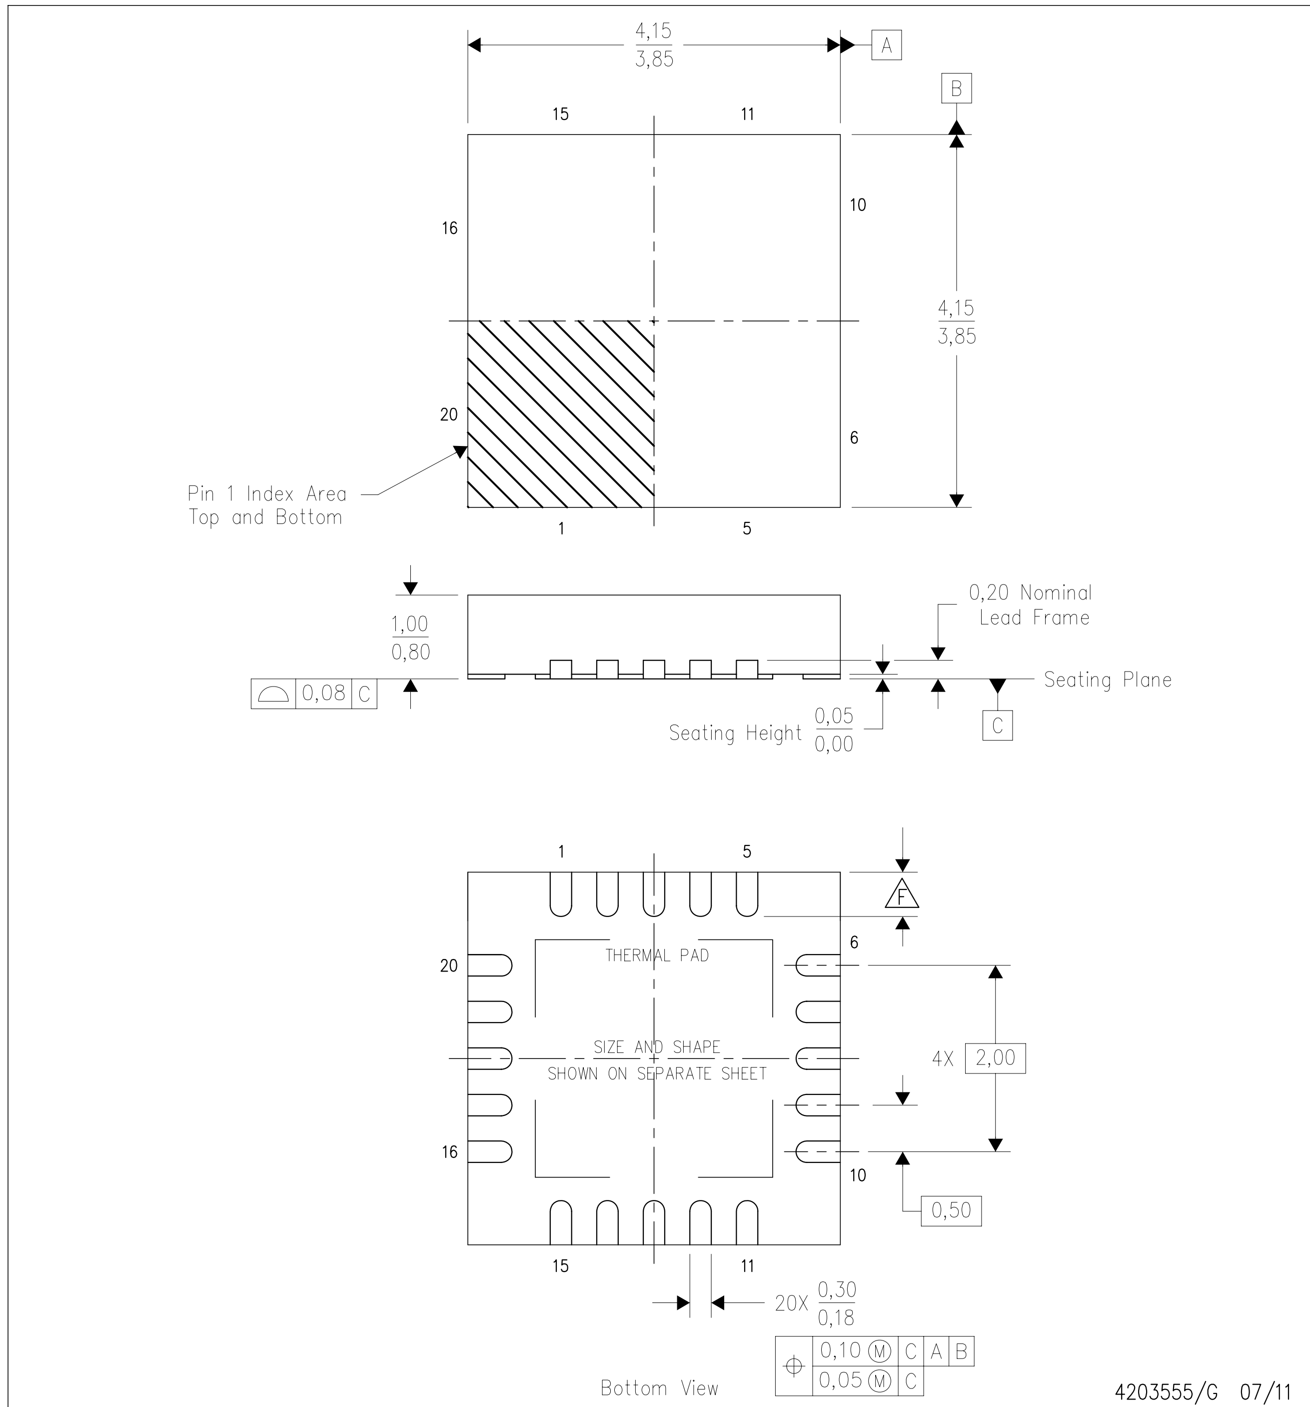
(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

RGP (S-PVQFN-N20) PLASTIC QUAD FLATPACK NO-LEAD



NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
- B. This drawing is subject to change without notice.
- C. QFN (Quad Flatpack No-Lead) package configuration.
- D. The package thermal pad must be soldered to the board for thermal and mechanical performance.
- E. See the additional figure in the Product Data Sheet for details regarding the exposed thermal pad features and dimensions.
- F. Check thermal pad mechanical drawing in the product datasheet for nominal lead length dimensions.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
